

Transports are means of communication we use every day.

Of all them, the aeroplane is the one which pollutes the most, but the car is the most used in more quantity.

Transports produces  $CO_2$  and it destroys the ozone layer and it has a consequence the greenhouse effect.

Greenhouse effect causes hurricanes, storms and tsunamis.

# What can you do?

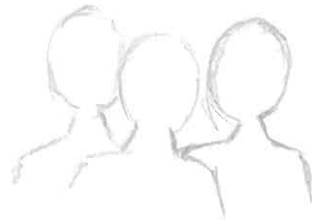

Use electronic cars better than normal ones.

Share car for less contamination.

Use public transport.

For short distances, go walking or by bicycle.
